Re: Bond Reduction Request
Seep Ridge Project
M/047/002
Uintah County, Utah

Dear Mr. Braxton:

The attached memorandum dated December 31, 1986 details the costs of site restoration at Seep Ridge as estimated by the Division of Oil, Gas and Mining. A cost of \$93,425 was estimated. Geokinetics currently has a Certificate of Deposit in the amount of \$100,000 posted as a bond for site restoration.

Since the date of the original estimate, Geokinetics has completed much of the site restoration work. The estimated costs to complete the remaining work, as taken from the original estimate and adjusted for inflation, are as follows:

Tank removal	\$12,835
Regarding of 13.56 acres	9,188
Revegetation of 19.29 acres	4,700
Supervision	<u>2,628</u>
Subtotal	29,351
Contingency (10%)	<u>2,935</u>
Subtotal	32,286
Inflation escalation (1986 - 1995 at 1.62% per year)	<u>5,024</u>
Total costs	\$37,310

Mr. Lowell P. Braxton
Utah Division of Oil, Gas and Mining
April 25, 1995
Page Two

Geokinetics requests your consideration in reducing the bond from \$100,000 to \$40,000, an amount sufficient to cover the remaining site restoration costs as estimated by the Division of Oil, Gas and Mining, escalated to 1995 dollars.

If you have any questions concerning this matter or the status of our site restoration efforts, please contact the undersigned.

Very truly yours,

GEOKINETICS INC.

Michael Hale
Vice President

Dear Mr. Prince:

Re: Bond Reduction Request, Geokinetics, Seep Ridge Project,
ACT/047/022, Uintah County, Utah

This letter is to request that the present bond in the amount of \$150,000.00 held by the Division of State Lands and Forestry for the Seep Ridge Project be reduced to \$93,425.00. Attached is a Memo to File from Division of Oil, Gas and Mining Reclamation Engineer Pamela Grubaugh-Littig, documenting the site visit recently conducted by DOGM staff. The site visit confirmed that the work outlined in Mike Leka's letter of November 10, 1986 (copy attached) had been completed.

Thank you for your prompt attention to this matter.

Sincerely,

Lowell P. Braxton

RE: Reclamation Site Visit, Seep Ridge Project, Geokinetics,
ACT/047/002, Uintah County, Utah

John J. Whitehead, Permit Supervisor, and Pamela Grubaugh-Littig, Reclamation Engineer, visited the Geokinetics site on December 10, 1986, to inspect the reclamation work done during the fall of 1986. The reclamation work outlined in the letter of November 10, 1986 from Mike Lekas to J. J. Whitehead was verified.

The areas were disked, seeded and fertilized where buildings, equipment, or ponds had been removed, as recommended by the Reclamation Biologist, Kathy Mutz (see letter to Mike Lekas from J. J. Whitehead, October 30, 1986).

The improvements at the Geokinetics Seep Ridge site that will be retained during the indefinite suspension are:

1. shop building and shop area
2. mobile home park (10 mobile homes)
3. two water wells - to be transferred to State Lands
4. 20,000 bbl tank battery
5. 3,000 bbl tanks (2)
6. evaporation pond #3
7. power house and power house yard
8. afterburner
9. absorber tower
10. modular office building
11. miscellaneous equipment stacked on site
12. road

Presently, a \$150,000 reclamation bond is held by State Lands and Forestry.

It is recommended that the bond amount be reduced to \$93,425 (1989 dollars) as shown in the revised bond estimate (attached). The bond reduction would be administered through Gail Prince or John Blake in State Lands and Forestry.

GEOKINETICS
REVISED BOND ESTIMATE
December 15, 1986

The improvements at the Geokinetics Seep Ridge site that will be retained during the indefinite suspension are:

1. Shop building and shop area
2. Mobile home park (10 mobile homes)
3. Two water wells - would be transferred to State Lands
4. 20,000 bbl tank battery
5. 3,000 bbl tanks (2)
6. Evaporation pond #3
7. Power house and power house yard
8. Afterburner
9. Absorber tower
10. Modular office building
11. Miscellaneous equipment stacked on site
12. Road

Reclaimed areas were verified on December 10, 1986 site visit.

Dismantling and Removal

(Assumption: Haulage of materials will be to Vernal.)

Shop Building

120' x 150' x 18' = 108,000 cf @ \$.17/cf = \$ 18,360

Office Building

30' x 30' x 15' = 13,500 cf @ \$.17/cf = \$ 2,295
